PROFESSIONAL SUMMARY

AI Automation Test Engineer with 11+ years of IT experience across manual and automation testing, specializing in **UiPath** (RPA), **Selenium WebDriver**, and **API test automation**, now transitioning into **AI/GenAI-driven test automation**. Hands-on with **prompt engineering**, **AI-assisted test case and script generation**, **AI-based test data generation and failure analysis**, and workflow automation using **n8n**. Built automation frameworks covering 500+ regression test cases across banking, healthcare, telecom, and automotive domains. Certified in **AI-driven testing processes** including basics of Python, **RAG**, **n8n**, Langflow, and DeepEval for automated testing pipelines.

TECHNICAL SKILLS

Programming Languages: Java, SQL, Python (Basics), VB.NET

Test Automation: UiPath Studio, UiPath Orchestrator, UiPath Assistant / Robot (attended vs. unattended automation), Selenium WebDriver, REFramework, TestNG, Page Object Model (POM), Data-Driven Testing, BDD

API & Service Testing: Postman, Insomnia, REST APIs, API Automation, JSON, HTTP/REST

AI & GenAI for Testing: Generative AI, LLMs, Prompt Engineering, AI-Assisted Test Case Generation, AI-Assisted Test Script Generation, AI-Based Test Data Generation, AI Test Result/Failure Analysis, AI-Powered Test Automation Workflows, RAG Fundamentals

AI Automation & Integration: n8n, Webhooks, REST API Integrations, Workflow Automation, JSON

RPA: UiPath, UiPath Orchestrator, REFramework, Selectors, Exception Handling, Queues, UiPath Robots, DataTables, Logging, Excel Automation, UI Automation, Workflow Development

CI/CD & Version Control: Git, GitHub, Jenkins, CI/CD, GitLab, Bitbucket

Database: SQL Server, PostgreSQL, SQL Developer

Tools & Platforms: Jira, Confluence, GitHub, n8n

AI Tools: Claude Mastery, GitHub Copilot, AI Agents with n8n, Langflow, RAG, Python Basics, CrewAI Basics, LLM Evaluation, DeepEval

Methodologies: Agile/Scrum, SDLC, STLC, Regression & End-to-End Testing

PROFESSIONAL EXPERIENCE

Automation Tester — Barclays *Aug 2022 – Sep 2026 | Pune, Maharashtra*

Project: *Counter (Legacy Banking System) —* ***UiPath*** *Developer |* ***AI-Assisted Testing***

Environment: UiPath *Studio, .NET, Hybrid Framework,* ***JIRA****, Confluence, Agile Scrum,* ***Generative AI****,* ***LLMs****,* ***Prompt Engineering***

- Developed a **UiPath** regression automation framework for a legacy desktop banking application, reducing regression execution time by 40%.
- Automated regression test packs for core banking operations, including cash deposits, withdrawals, cheque deposits, and mixed credit transactions.
- Built an **AI-powered testing agent** using **prompt engineering** and **LLMs** to generate test artifacts, test plan previews, and high-level test cases directly from business requirements in Confluence and **JIRA** — streamlining manual test preparation.
- Integrated **JIRA** with **UiPath** via HTTP activities to automate publishing of AI-generated test cases, defect tracking, and test result reporting, improving documentation efficiency and requirement traceability.
- Validated end-to-end banking workflows and peripheral integrations with TAU machines, printers, and scanners.
- Automated smoke and **API testing** to support faster release validation.
- Mentored junior team members on **UiPath** framework development and test automation best practices.

Senior Quality Engineer — LTI Cuelogic *Feb 2021 – Jul 2022 | Pune, Maharashtra*

Project: *RYL (Recover Your Liability)*

- Performed E2E testing as both manual and automation tester.
- Automated smoke & sanity testing for Web UI and APIs.
- Owned test documentation — test plans, test cases, RTM, and QA report reviews.
- Participated in Agile ceremonies and managed stakeholder expectations.

Senior Test Analyst — Nihilent Technologies *Aug 2016 – Jan 2021 | Pune, Maharashtra*

Project: *Skilled Medical – PlaceM2, Data Clean Up, IBS Multichoice System*

- Performed E2E testing for PlaceM2 using manual testing tools.
- Defined backend testing strategy for data clean-up and UI validation.
- Conducted functional, integration, and system testing for the Multichoice IBS system.
- Defined QA policies, test strategies, and best practices for healthcare domain projects.

Software Engineer – Testing — Iasys Tech Pvt. Ltd *Feb 2015 – Jun 2016 | Pune, Maharashtra*

Project: *Honda Projects (E-Drive, Fuel Cell, FAMS-Lab)*

- Managed test data for Honda R&D web applications.
- Performed functional testing across all test data management modules.
- Executed UI validation, regression, and smoke/sanity testing for the entire workflow.
- Handled defect identification, reporting, retesting, TCM creation, and release.
- Assisted in client UAT.

CERTIFICATIONS & RECENT AI TRAINING

- UiPath Advanced RPA Developer Certification
- Advanced Selenium & Java Certification – Softedge Institute
- AI Career Accelerator Program — Be10x
- AI Testers Blueprint — The Testing Academy

EDUCATION

Bachelor of Engineering (B.E.) – Information Technology - KDK College of Engineering, Nagpur University - 2012
